The Style Browser

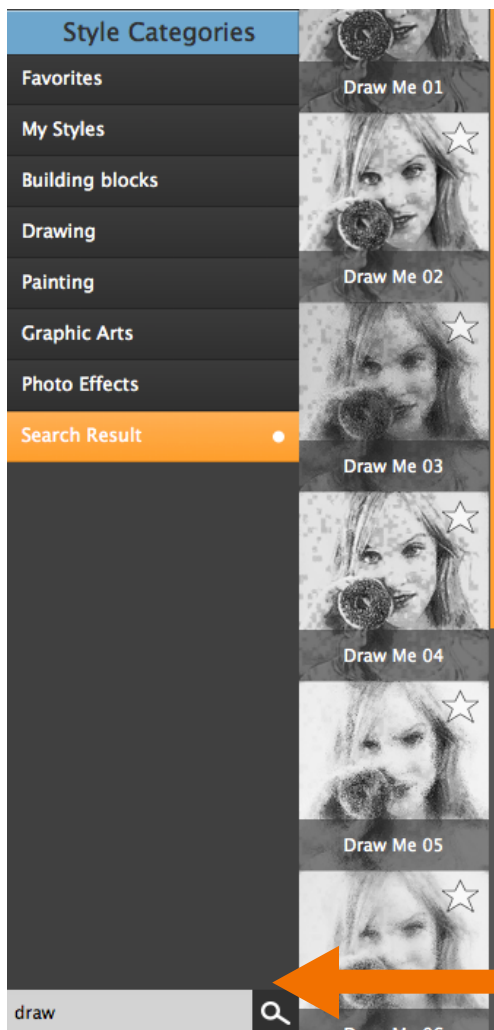

HOW THE STYLES BROWSER WORKS, HOW TO ADD NEW CATEGORIES AND SEND STYLES TO THE FAVORITES CATEGORY

About the Style Categories Browser

The Style Categories Browser is on the left side, where you can find all the built-in styles ready to use.

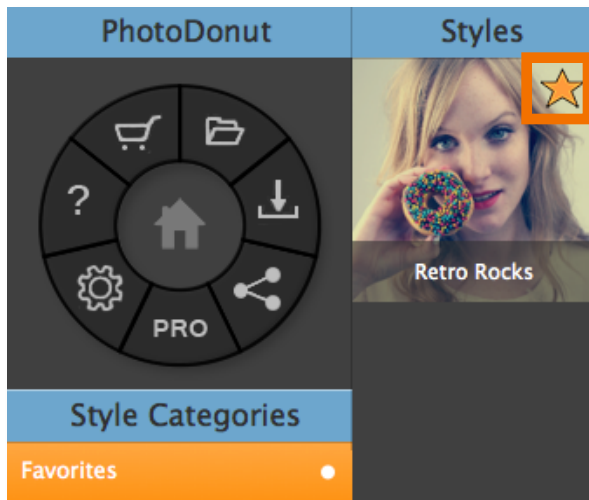

A small thumbnail image with the name of the style helps you to imagine how they could look like on your photo.

The styles are organized in a category and sub-category tree. When you click on a main category, within them the styles are listed in alphabetical order. The Style Browser columns can be individually scrolled with the mouse wheel.

Underneath the Style Categories Browser there is a search box, what helps you find styles, stylepacks. Just type and press Enter.

Favorite Styles

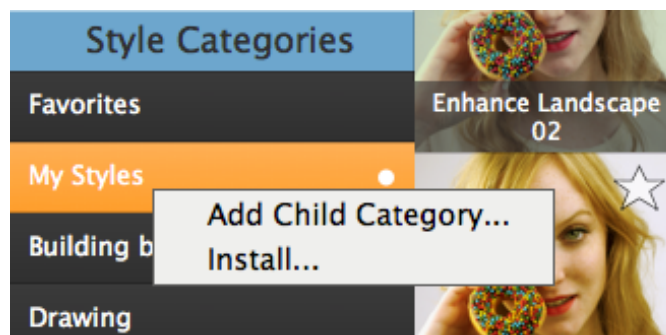

You can put the styles you love or use the most to the Favorite category for quick and easy use.

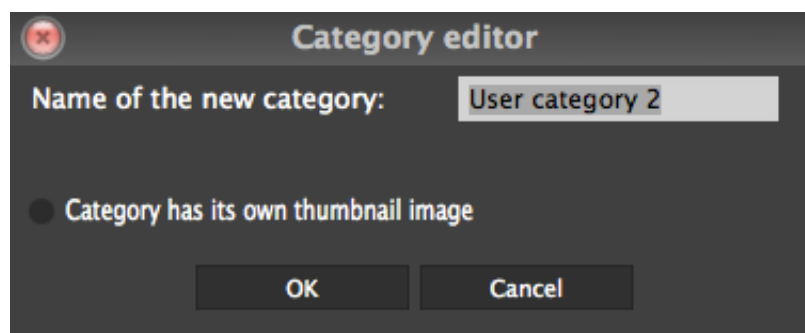

Click the star button in the right corner on the thumbnail of the style. This creates a shortcut to the selected style in the Favorites category.

How to add new style categories?

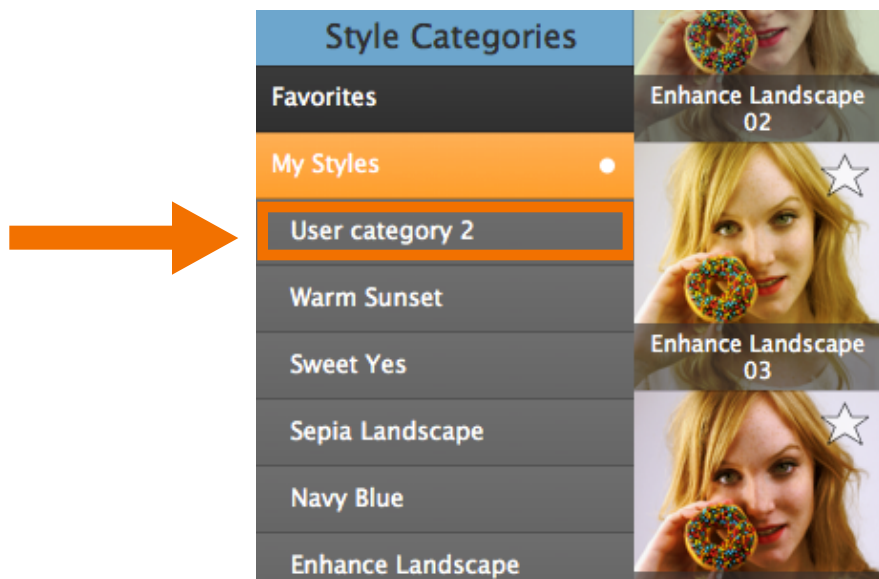

Right click on the **My Styles** category, then click on **Add child category**,

a small **Category editor** window appears:

Add a name, and click OK. Your new category is created:

Right click on the category to add new subcategories, delete or edit.
